

**Dear Sir/Madam,**

I'm very pleased to provide this letter of recommendation for Oğulcan Dülger, who joined our team as an intern from July to September 2016.

Oğulcan proved a competent, autonomous and quick-learning intern. From the start until the end of his internship he mainly worked on our Recyclebot project, a machine that recycles old PLA-prints and turns them back into print-ready filament. This machine, developed a few years earlier, was outdated and no longer in use. Oğulcan focused on re-engineering the machine and focus on quality control.

Oğulcan proved a quick learner and made use of all the machines in the lab.

Furthermore, he was a team player who has been popular with his colleagues and the lab community alike. He was efficient, and energetic at work, full of ideas and capable in executing them. Oğulcan was a great help and not afraid to get his hands dirty. The combination of his hands-on mentality and the understand theoretical concepts makes him a great all-round and multi-talented colleague. Oğulcan has left a memorable impression at Timelab.

We wish him all the best for his future career and we are sure that whichever challenge he takes on his skills and talent will make him a highly valued asset and team member. If there are any questions regarding Oğulcan don't hesitate to contact me at [pieter@timelab.org](mailto:pieter@timelab.org)

Sincerely,  
Pieter Dauwe,
