

To whom it may concern,

It is my pleasure to recommend Oğulcan Dülger for the position of employment.

Oğulcan Dülger and I have worked over the past year, 2017, as he has offered his Mechanical Engineering and CAD working insights to work effectively with the mUve 3D team in Grand Rapids, Michigan, USA.

I thoroughly enjoyed my time working with Oğulcan and came to value him as a truly irreplaceable asset to our team. He is dependable, diligent about task completion, and incredibly hard-working. Further to that effect his is a great asset to our future intentions with product design and community-based engineering.

His knowledge of current software, ability to expand quickly to learn new software and ideas, and expertise in CAD design/documentation was a huge advantage to our entire office. He put this skillset to work in order to transition our current machines' CAD models into a to freely available and open CAD software so that our open-source methodologies were kept in-tact. Just as important, it allowed our entire customer base to see full 3D CAD of our products without having to be any kind of expert, and without having to purchase expensive software.

Along with his irrefutable talent, Oğulcan has always been an absolute pleasure to work with. He is a true team player, and always manages to foster positive discussions and bring the best out of himself and others. I can confidently recommend Oğulcan to join your team. I know that he will be a beneficial addition to your organization as he has always been a resourceful and strong component of ours.

Please feel free to contact me at dean@muve3d.net should you like to discuss Oğulcan's qualifications and experience further. I'd be happy to expand on my recommendation.

Best wishes,

Dean C. Piper Jr.
