Django, Python
REST API

Layout Desing, Figma
Graphic Desing, Figma

Journal Desing
Video Editing, Premiere
Directing
Leading a Goal Oriented Team

CAD, Inventor
Design for Manufacturing
Rapid Prototyping

Artist?
My journey started as a mechanical engineer. I liked my subject but I wanted to be more, wanted to do more. I traveled, I witnessed, I imagined. And I **created**. Just like an artist would do.

Why not Web?

I grew this passion of building web apps. I taught myself how to code, how to design and how to build.

Tools to Build

I learnt **HTML, CSS, JS**. Then backend, **Django**. And for reusability, **React**.

They helped me to actualize my thoughts. They were not the goal, they were my tools.
